

About the Fund

The Gippsreal Mortgage Investment Scheme (“the Fund”) aims to deliver regular income at a pre-determined rate. The Fund offers attractive returns¹ whilst seeking capital stability through robust risk management measures combined with prudent lending standards.

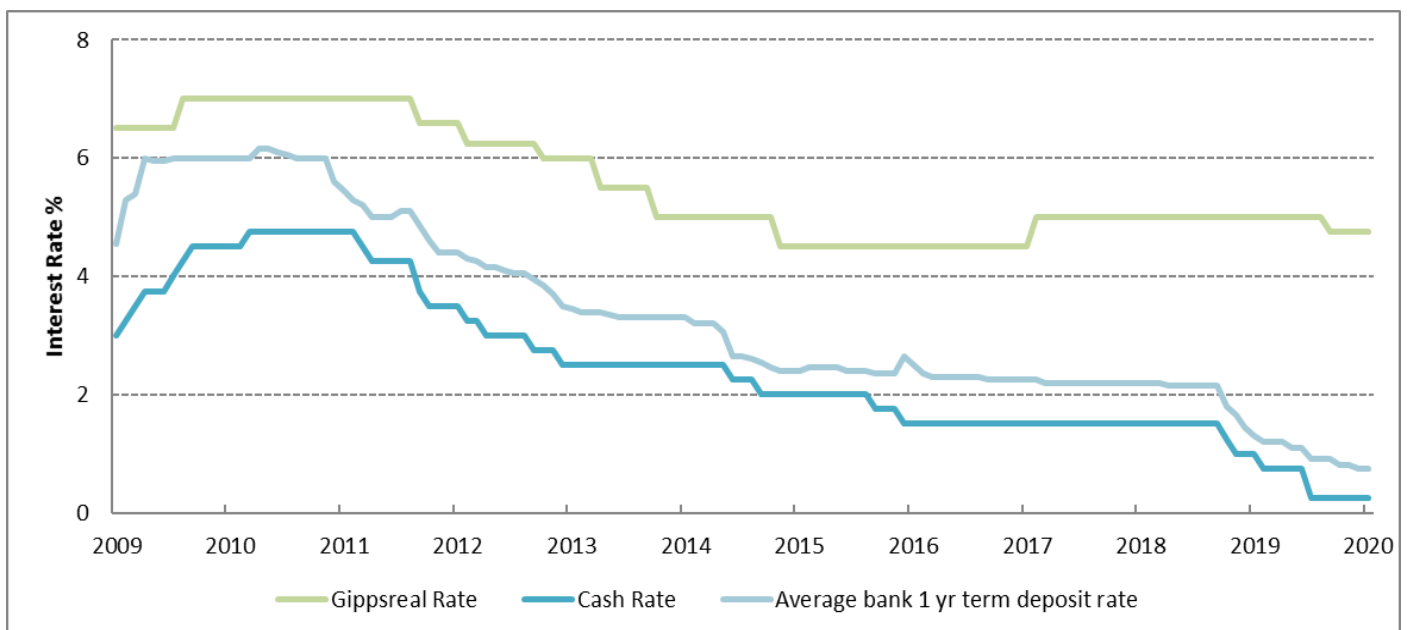

The Fund provides for investments in loans secured by registered first mortgages over real estate property including residential, commercial, rural and vacant land. Loans are approved in accordance with Gippsreal’s lending policy principles and loan to value ratios that do not exceed a maximum 66.66% of the security property value.

The Fund is actively managed and provides an alternative option for the fixed income asset allocation of a defensive portfolio.

This fund may be suitable for investors who are looking:

- ◆ to diversify their Australian sourced income and diversify within the Fund through separate loans;
- ◆ for a predetermined rate and fixed investment term;
- ◆ for a less volatile income solution;
- ◆ for a passive income to replace or supplement their salary and or pensions;
- ◆ for transparency and choice with their investments.

Fund Performance
